#### Industrial Successes of Chinese Railroad Men

Peiping, 23 (TASS), From the Hsin-hua She it is learned that the workers and employees of railroads of the Chinese People's Republic on 18 December fulfilled the year's plan for transportation on schedule.

The successes of workers in railroad transportation is the result of the great wave of production emulation. In the Tientsin station, where more than 70 percent of the railroad men take part in production emulation, the time for loading and unloading of cars has been reduced by four times. The whole Tientsin railroad network fulfilled the year's plan for freight transportation 16 days ahead of schedule.

In Northeast China nearly 160,000 railroad workers are taking part in the patriotic production emulation campaign.

The number of accidents on all railroads of the Chinese People's Republic was reduced by 39 percent in November as compared with the spring months of the present year.
